

## Psychology (EBG)

### Evidence Based Grading

Final grades in this course will be determined using Evidence Based Grading (EBG). EBG determines grades that reflect what students know, understand, and can do.

**Purpose Statement:** *The purpose of evidence based grading is to provide students with clear learning outcomes and instruction, collaborative feedback, grades that reflect proficiency and growth.*

**Course Description:** Psychology is the scientific study of behavior and mental processes. The course will emphasize the mind and its development, principles of learning, memory, sensation and perception, personality theories, emotion and stress, states of consciousness, motivation, and abnormal behavior.

**Attendance:** Students are required to be in school every day. Students are responsible for communicating with their teachers to make up for missed learning.

**Course Expectations:** Although not everything is graded, everything is important. In order to demonstrate growth and learning, students will need to:

1. Participate in class activities (take notes, work in a group, complete in class tasks, ask questions) without distractions (cell phones, games, etc.)
2. Use morning time and the teacher to seek help outside of class when needed.
3. Complete all assessments within teacher timelines.
